

Safe Zones™

powered by ADIN

safezones@echomessaging.com

US: 1-401-475-9642

US-based. All software developed and owned by US company

Safely bring employees, students and contacts back to work and school during the COVID-19 Pandemic

GET AHEAD OF THE PROBLEM:

- Quick Start page to scan QR barcode to determine person's status, if they are safe
- Quickly scan in students at the bus stop, school, or classroom; employees as they enter the building; patrons at your restaurant, etc.
- Scans hundreds or thousands per minute
- Know who needs tests, which ones and when
- Works with your contact data
- Personal, Family, Educational, Corporate, and Enterprise accounts available

The screenshot shows the Safe Zones web interface. At the top, there's a navigation bar with 'Home', 'Pricing', 'About Us', 'Contact Us', 'Help', and 'Log In'. The main content area has a 'Getting Started' button and a 'Get Started with Safe Zones' section with three steps: 1. Create an Account, Choose your plan; 2. Connect to your Employee Database, spreadsheet, etc; 3. Communicate in one place to everyone healthy and safe. Below this is a 'SAFE ZONE' section with a QR code and a photo of Gerald Deane. To the right is a 'Daily Temp (F) for Past 14 days' graph showing temperature fluctuations. At the bottom, there are two tables: 'Tests' and 'Check-ins'.

Date	Time	Test	Outcome	Location	Test/Requirement	Verified/Status	By	Expires	By
6/15/2020	12:20:16	Antibody	Not Required in 7 days	Home	COVID-19 Self-Check	Self-Certified	6/15/2020 12:20:16	7 days	6/22/2020 12:20:16
6/15/2020	12:20:17	Antibody	Not Required in 7 days	Home	COVID-19 Self-Check	Self-Certified	6/15/2020 12:20:17	7 days	6/22/2020 12:20:17
6/14/2020	7:24:24 PM	COVID-19	Not Required in 7 days	Home	COVID-19 Self-Check	Self-Certified	6/14/2020 7:24:24 PM	7 days	6/21/2020 7:24:24 PM

STAY AHEAD OF THE PROBLEM

- Monitor & track all tests, screenings, expiration dates and temperature checks
- Reminder before test expiration date and Early fever detection
- Automated messages continue to inform and update your contacts

KEEPS UP WITH CHANGES

- Change tests, screening questions, requirements anytime - all contact statuses are instantly updated
- Insight into everyone's status with one barcode scan of Health Badge or Mobile App
- Make decisions based on facts: test results, expiration dates, fever tracking

HOW IT WORKS

1. Connect to your contacts - Live connection to your Contact Management database or drag/ drop CSV export files
2. Define which tests you require to enter your Safe Zone - Or use the default tests that come with your account
3. Scan people as they enter your Safe Zones to know their current status for tests.

Safe Zones™ uses ADIN™ - AI automation engine to handle all automation with connections to contacts, all communications and reminders with contacts, verifies every person entering the areas you are protecting.
